

Contents

Preface	vii
Stereochemical patterns formed by addition to fullerene C ₆₀ D.L. Kepert and B.W. Clare	1
Structure and dynamics of chiral allyl complexes of Pd(II): NMR spectroscopy and enantioselective allylic alkylation P.S. Pregosin and R. Salzmann	35
The synthesis of ruthenium and osmium carbonyl clusters with unsaturated organic rings P.J. Dyson, B.F.G. Johnson and C.M. Martin	69
Intramolecular coordination in Group 3 and lanthanide chemistry. An overview M.P. Hogerheide, J. Boersma and G. van Koten	87
Bismuth derivatives for the oxidation of organic compounds M. Postel and E. Duñach	127
Dynamic, reactivity and catalytic behavior of pseudo-undercoordinated ruthenium and rhodium complexes stabilized by intramolecular solvents E. Lindner, S. Pautz and M. Haustein	145
Catalytic applications of rhodium complexes containing trialkylphosphines M.C. Simpson and D.J. Cole-Hamilton	163
Recent fundamental studies on migratory insertion into metal-carbon bonds K.J. Cavell	209
Corrigendum	245
Errata	247
Author index	255
Subject index	255
